DOCUMENT PROCESSING · COMPUTER VISION

Document Extraction Agent

Reads invoices, packing lists, B/Ls and certificates and turns every file into verified data. What it cannot be sure of, it does not guess: it shows it to a person with the evidence alongside.

READS	CHECKS	CROSS-DOC	DECIDES
agent	**code**	**file**	**person**
Three blind reads per field	Arithmetic, check digits, deterministic layer	Each document vouches for the others	Reviews doubtful cases with the evidence (HITL)

HOW IT WORKS

01 · Intake
Email, PDF, Excel or scan; true file type. Kept as the Source of Truth

02 · Image & OCR
Rotation and centring by vote; OCR anchored to the digital layer

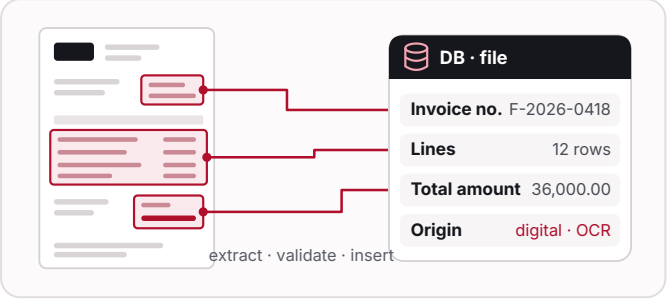

03 · Classification
Splits the documents in each PDF; page numbering rules

04 · Extraction
Three blind reads; numbers are decided in code

05 · Consistency & validation
Cross-document checks and procedure controls

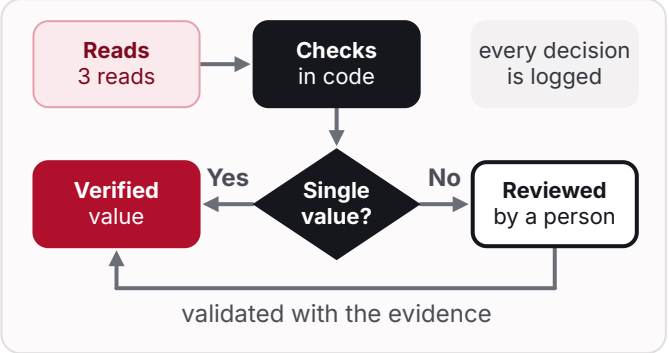

RESULT Data with its origin, a human review queue and output to ERP, CRM, other systems or processes.

STRUCTURED DATA

Real documents (scans, stamps, mixed PDFs) · **Extraction traceability** · **Purpose-built models per process**

NEVER GUESS SILENTLY

SUCCESS STORY · CUSTOMS FREIGHT FORWARDER

800–1,500
emails a day in the general inbox
Triage, classification and routing of every email to its department

6–8
documents per file
Invoice, packing list, B/L, health, catch and SOIVRE certificates

94
automated checks per procedure
Fisheries · SOIVRE · TRACES, with facts already verified in code

3.5–9.3 h
of review saved per day
15–40 files/day × 20 min average × 70% saving

Picture it with your documents

Over 40 years of IT experience in logistics, industry, banking and the public sector.
